EXPERIENCE

Fuel Medical Group, Camas, WA – *Full Stack Developer*

DECEMBER 2016 - PRESENT

Built and maintained enterprise software for audiology practices. It handled the front office check in, creating and sending the audiograms using D3.js, and ordering the hearing aids for the practice. The application integrated with EPIC EMR service, and several hearing aid APIs.

- PHP, Zend2, Doctrine, Vue.js, D3.js, ES6 JavaScript, API, Git, JIRA

NetVendor Inc, Portland, OR — *Web Developer*

SEPTEMBER 2016 - DECEMBER 2016

Built a service website in Laravel 5.2 that is used by property managers to track their vendors. The vendors then enroll into the system and pay a subscription. The software uses authorize.net API integration, performs background checks, and generates reports. It is also an internal tool for a support center. I worked mostly on the front end of this website with jQuery and blade templating engine.

- PHP, Laravel, JavaScript, jQuery, AJAX, MVC, API, Git

McClain Concepts Inc, Portland, OR — *Software Developer*

MARCH 2016 - AUGUST 2016

Brought onboard to a team of 6 developers for a very rushed and chaotic project involving two applications. Both allowing the ability to generate unique sets of websites based on templates using dynamic sass variables. The application followed a subscription billing model in which a user would purchase a template site to drive traffic to another target site. Both applications required us to configure multiple endpoints for API calls to pass data back and forth to each other upon certain user triggered events.

- PHP, Laravel, JavaScript, jQuery, AJAX, MVC, API, Git, JIRA

CDK Global LLC, Portland, OR — *Jr. PHP Developer / Tech III*

OCTOBER 2013 - MARCH 2016

I managed all SharePoint sites, MSSQL Databases, and internal web pages used by an electronics repair facility to track equipment and costs.

- MSSQL Studio 2012, HTML, CSS, jQuery, AJAX, PHP, Microsoft SharePoint, InfoPath, Word, Excel, PowerPoint.

SKILLS

LANGUAGES/LIBRARIES

PHP, Eloquent, Doctrine, ES6 JavaScript, jQuery, SASS, LESS

FRAMEWORKS:

Laravel, Zend Framework, VueJs

WORKFLOW TOOLS

Git, GitHub, Bitbucket, GitLab, Homestead, Elixir, Vagrant, VirtualBox, Docker, WAMP, Composer, NPM, Homebrew, MySQL Workbench, Filezilla, PHP Unit, eslint

EDITOR & DEBUGGERS

PHP Storm, SublimeText3, Atom, Chrome/Firefox Dev Tools, Postman, JSFiddle

OS

OSX, Ubuntu, Linux, CentOS, Windows 7/10, Windows Server 2012

COLLABORATION

JIRA, Confluence, Asana, SharePoint, HipChat, Slack, GitHub, Bitbucket, Gitlab, Peer Code Review, Daily Scrum,

PRESENTATION

Microsoft Word, Microsoft Excel, Microsoft PowerPoint, Gimp, SnagIt, Atlassian Confluence

CERTIFICATIONS

Microsoft MTA 98-364

Database Fundamentals

EDUCATION

ITT Technical Institute, Portland — *Associates AS*

JUNE 2004 - JUNE 2006

CEET (Computer and electronics engineering technology)

Clark College, Vancouver, WA

JUNE 2014 - CURRENT

Classes in WordPress, HTML/CSS, Python, Apache, SQL
